The following is a quote from Brad Steiger's 'THE UFO ABDUCTORS' (1988., Berkley Books., N.Y.):

"In 1969 I and my research associates... Loring G. Williams and Glenn McWane, were bombarded with the claims of dozens of contactees who said that they had had an implant left somewhere in their skulls, usually just behind the left ear. These contactees/abductees came from a wide variety of occupations, cultural backgrounds, and age-groups.

"We employed private detectives and medical doctors... in an attempt to learn what archetype had been fed into their particular group consciousness. We never found any implants that were detectable to X rays, but our hypnotic sessions turned up an incredible amount of fascinating, albeit bizarre, information about underground UFO bases, hybrid aliens walking among us, and thousands of humans slowly turning into automatons because of readjusted brain wave patterns."
